- Person
- How
- Is
- Your
- Day
- Going?

leadership

Club 1 | Title
- If you're in school, this is a good place to put the clubs you're in or other stuff you're involved with.
- You could put extra-curriculars here! The title is easy to change.

Club 2 | President
- If you have leadership positions that's also a good thing to put here!
- Maybe you run a hackathon, or a dance team, or an interest group, that's pretty cool!

experience

Big Company 1 | SWE Intern or *whatever*   An interesting place
Over the summer
- Worked on some very cool stuff with some very cool people, made a lot of stuff a lot better
- Just explaining stuff in more detail, I used some technology to improve some aspect of some system or product and here are some very general results.
- Here are some more specific results or improvements if you care, I'm just putting this here so my big internship has 3 lines and seems more important rather than less.

Maybe a smaller company | Software Engineer Intern   Town or City, State
June 20XX - August 20XX
- Did some stuff at this company
- Maybe you did, maybe you didn't do as interesting stuff as big company but you still have to explain it and try to impress the recruiter
- We all know people like numbers, so let's see that 10X increase in something **important!**

Idk something else? | Some title   Probably your hometown
You did this in high school
- You might have actually done some interesting stuff but you can't make it seem less important than the big company.
- Alternatively, you didn't do anything interesting and have to make it seem like you did, similar to the "Maybe a smaller company" example.

projects

A fairly decent project | Open-source project - Author
- Seriously, your personal projects should be good. This section doesn't strictly **need** to be filler.
- You develop software! You should have something you're passionate about here!
- It's okay if you're new to programming or software, making things is hard but here is where you show what you're *excited* about!

Something else open source | Open-source project - Contributor
- Contributing to open source is one of the best ways to learn how to write good code. You might encounter some bad code though, and that's where you can contribute!
- This is another area to show something you're interested in - open source is awesome and some projects may give you similar SWE skills and experience to the big company up above.

Maybe another project? | Open-source project - co-author
- Not everyone writes code in every waking moment of their life. Build something you're proud of!
- However, everyone has projects they're embarrassed of, and sometimes that is the project that goes here.
- This could even be a school project!
